

STATEMENT OF CONCERN
IN SUPPORT OF AMICUS CURIAE BRIEF TO
THE NEW MEXICO SUPREME COURT

We, the undersigned, are medical doctors practicing in or near El Paso, Texas. Prior to learning about the Montañño decision we proceeded with the understanding that if we as Texas residents elected to provide medical care in Texas to patients voluntarily choosing to leave New Mexico and seek medical treatment in Texas then Texas law would cover any claim arising out of the care we provide in Texas. If the Montañño appellate court decision stands, then liability concerns will play a more prominent role in the decision of Texas providers to see New Mexico residents for elective care and may impact the willingness of Texas doctors to continue to accept New Mexico patients on an elective basis. It may also disrupt the time-honored practice of New Mexico physicians referring their patients to Texas for elective treatment in that Texas providers may be less willing to accept those patients.
